

TROUT CREEK MINING AND MILLING COMPANY

Promising Mining District to The North of Burns to Receive Attention of Capital at Once. New Corporation Takes up Development and Will Install Necessary Machinery Soon

O. J. Darst and A. J. Kane are from the Trout Creek mining district this week interesting people of this vicinity in the company that has just been incorporated to develop some of the excellent prospects in that promising section.

Mr. Darst informs The Times-Herald that he and his associates have just completed the proper steps to incorporate under the name of the Trout Creek Mining and Milling Company with a capital stock of \$100,000. O. J. Darst is president of the company, J. W. Withers of Harney, vice-president, F. S. Slater of Canyon City, cashier of the First National Bank of that place, is secretary-treasurer of the company. The initial papers have been filed with the secretary of state and designate Canyon City as headquarters of the company but this will be changed and headquarters will be in Burns. This district is north and east of this city a distance of about 19 miles.

Sidney B. Vincent, state mine inspector, was at the mine the last of this week and gave the new corporation permission to sell stock and also gave the section a most flattering recommendation. He found the property very promising in every respect and in fact the entire district he considers a most promising mineral field.

Besides the property covered by the new corporation there are some 25 claims in the camp that have had considerable development work done on them and which promise rich returns. The mineral belt covers a territory of some six miles long and one and a half miles wide.

Mr. Kane, who is a miner of many years experience, will have an active management of this new concern and he informs The Times-Herald that he considers the prospects as good or better than any other in his experience in the west. The formation is

porphyre and the ledge on which the company expects to do its first development work is from 3 to 7 feet wide in the main iron, sulphide values in gold, silver and lead that assay from \$5 to \$75.

Two shafts have been sunk on this ledge, one 40 and the other 60 feet in depth and a tunnel 100 feet long, all in ore. Mr. Kane expects to install a steam lift at once and will keep two shifts of men at work during the winter on development work and as soon as sufficient has been accomplished along this line a concentrator will be brought in and placed on the ground.

Both Mr. Darst and Mr. Kane are very confident of the success of the district. The former has been in that camp for many years but has been at some disadvantage in that he did not have sufficient means to develop the property but now that he has assistance they are practically sure of this being one of the greatest mining camps in the west.

Mr. Kane's long experience in mining gives him authority in such matters and he is ready to stake his money and reputation on the outcome of the present venture. He says it is a mineral district that will last as the formation is such that if the ledge now uncovered doesn't go down in good paying qualities to a depth as far as they want to go it is the first in his experience.

Several of the local people are taking stock in the new corporation, the shares being \$1 each and are sold at par. It is now somewhat difficult to get papers approved by the Corporation Commission of the state in that the "Blue Sky Law" has to be complied with in every respect and the rulings of the Commissioner, therefore they are happy to find their proposition meets with the entire approval of both the Commissioner and Mine Inspector.

LATEST DEVELOPMENT LEAGUE NOTES

(From Our Portland Correspondent)

Reduced rates for the Manufacturers and Land Products Show have been arranged on the basis of one and one-third fares for the round trip. Tickets will be on sale October 27, 29, and 31, November 3, 5, 7, 10, 12 and 14 in territory from Eugene north, The Dalles west, Grand Dalles west, Centralia south and Rainier east, except that in South-west Washington October 28 will be substituted for 29 on account of Southwestern Washington Day at the show. Final return limit two days after date of sale. From all other railroad stations in Oregon, Washington and Northern Idaho, sale dates will be October 27 and 30, November 3, 6, 10 and 13. Return limit, Monday following date of sale.

Rate of fare for exhibitors will be published three days before the opening of the show the first two days of the show on the basis of one and one-third of the one-way fare. Certificates will be good for return on dates of show and two days after its close.

All sections of Oregon are urged to co-operate with the Portland Commercial Club in the collection and preparation of exhibits of Oregon products for eastern land shows and to be used on exhibit cars to advertise the resources of the state. Any producer who can furnish unusually fine specimens of grains, grasses or other crops, is invited to ask for tags and printed instructions as to packing and shipping same. Railroads will handle such shipments free of charge if prepared and tagged according to directions.

The first car of Bartlett pears from Grants Pass sold in Chicago for \$2 per box 25c above shipments from any other section.

THE PUBLIC AND HIGH SCHOOLS OPEN MONDAY

Largest Enrollment in History for First Week With Enthusiasm Among Pupils and Instructors. Schools of City Among Best in State. New Teachers Work in Harmoniously

While this section has furnished a large number of school pupils for the higher schools of the state this year the schools of Burns start the year with a larger attendance than ever before in their history. The bells brought new scholars to the places of study last Monday and all the teachers were ready for the work with an enthusiasm that portends a successful year.

Principal Sutton of the public school reports five more on the enrollment the first day than last year and there have been ten added during the week. He also had some new teachers in the school but all have shown their ability during the first week to ably care for their grades and work harmoniously with the faculty, therefore everything points to a successful year.

The additional teacher in the school has caused some changes to be made in the building and the assembly room is being fitted up as a class room. The furniture had not all been installed the first of the week, thus causing a little confusion but it will soon be in readiness and the several grades established in their respective rooms.

There were 184 enrolled the first day and with the ten added makes a total of 194. From past experience this would indicate perhaps 250 during the school year as many have not yet been able to get in from the farms where harvesting is still in progress. The first days enrollment was distributed in the several grades as follows:

Mrs. Kelsey, first grade, 8 boys and 10 girls.
Miss Swain, first grade, 10 boys and 2 girls.
Miss Bessie Swain, second grade, 12 boys and 16 girls.
Mrs. Clark, third grade, 17 boys, 14 girls.
Miss Swearingen, fourth grade, 16 boys, 10 girls.
Miss Cawfield, fifth grade, 12 boys, 10 girls.
Miss Hodder, sixth grade, 13 boys, and 9 girls.
Miss McGee, seventh grade, 7 boys, 12 girls.
Principal Sutton, eighth grade, 9 boys, 7 girls.

With modern equipment and a magnificent building with every convenience, the public school of Burns has attracted a large number of school patrons from other parts of the county to move here for the school year in the past and the number will be augmented during the present year. The citizens of this district spare no expense to increase the efficiency of the schools and it has a good effect upon the entire country.

Houses to rent have been in demand this year as in the past and now the water and sewer lines are sure we shall find many

RE-BUILDING OF BURNED DISTRICT IS TO BEGIN

Insurance Adjusters Settle Fire Losses And Clearing Away Debris Begun To Make Ready for New Structures. Some to be Erected This Fall and Tenants Ready to Occupy Them

Present prospects are that even this fall some of the buildings recently destroyed by the fire will be put in shape for tenants. In fact Geo. Fry will at once begin the repair of the building adjoining the post office and have it in readiness as soon as possible. There is also some talk of the space formerly occupied by the wooden structures of N. Brown & Sons between the Harney County National Bank and the Bedell building being filled in with stone at the back and a plate glass front to be used by one of the firms that was put out of business by the fire. This has not been definitely settled, however, but builders say it can be put in shape in a very short time should the parties get together and decide.

Adjusting agents of the several insurance companies have been here this week and the losses occasioned by the fire have all been adjusted, some are not yet closed but there has been no difficulty in making the adjustments so far as we can learn.

There has been no move to replace the French hotel and the Levens buildings at the present time but there is strong talk of a modern hotel being built on the ground and those interested are discussing the plan. The hotel will depend to some extent upon the disposition of the water and sewer question and therefore it is urgent that this be settled as soon as possible. Should lo-

THE PUBLIC AND HIGH SCHOOLS OPEN MONDAY

Largest Enrollment in History for First Week With Enthusiasm Among Pupils and Instructors. Schools of City Among Best in State. New Teachers Work in Harmoniously

people coming to our little city to make their permanent homes as they appreciate the modern conveniences and sanitation together with the excellence of the schools.

The high school starts of with a better attendance for the first week than in the past and this number will no doubt be increased very materially during the present month. The freshman class has 24 but the result of the eighth grade examinations recently held will perhaps increase this class to several more. There are 6 Seniors, 14 Juniors, 7 sophomores and 24 freshmen this week with others coming in.

The only change in the faculty this year is Miss Mildred Wilson, who takes the place of Miss Cowgill as instructor in domestic science and art. Mr. Leedy, instructor in agriculture, arrived last Saturday in company with Judge Miller and finds his boys ready for work with renewed enthusiasm.

Principal Shirk feels much encouraged with the outlook for the coming year. The Times-Herald is more than pleased to note the advancement of the schools of this vicinity and will do its part toward the work at any time the opportunity presents itself.

Purity of Farm Water Of First Importance

The farm water supply is one of the most important factors in the general health of the family, writes T. D. Beckwith, professor of bacteriology at the Oregon Agricultural College. The supplies of the city are usually purer than those of the farm because they are better guarded from disease-producing bacteria. Persons who drink infected water are likely to contract the particular disease caused by the kinds of germs present in the water. Hence the need of keeping the water pure.

Water is never impure however so far as the bacterial content is concerned, unless there is some source of contamination. Most diseases are caused by some form of germ, and the germs never generate spontaneously.

If proper provision against this contamination is provided by some effective means, the health of the family will be greatly increased.

Deep wells pass through an impervious layer of rock or soil and tap a subterranean water supply, while shallow wells receive their supply from the immediate neighborhood, usually with a radius of a few feet. This is true, regardless of the actual depth of the well below the surface of the ground. If the deep well, which is sup-

A Narrow Escape From Loss of Grain.

D. Dickenson, who is farming the Brown places just north of town and next to the flour mill, had a narrow escape from losing a large part of his barley crop Thursday by fire catching from the engine of the threshing machine. The fire was extinguished before much damage had been done, however. Last year Mr. Dickenson sustained quite serious loss by fire during the threshing period and therefore had his crop insured this season.

Finest alfalfa, timothy and red top hay baled may be had at the Goodman feed barn is south Burns.

See the greatest Wild West Exhibition ever staged!

Never before has such a show been held in America! Every minute filled with exciting novel features. One thrilling feat after another, by broncho riders, cowboys and cowgirls. Hundreds of performers. Six bands. Indian races—cowboy races—buffalo chase, with real buffaloes—Indian massacre—stage-coach holdup, etc. Plan now to attend
